

NEELANSH EQUIPMENTS & MACHINES

A Premium Quality Product

www.neelanshequipment.com

About us

Neelansh Equipments and Machines is a group of trained and experienced professionals providing prominent and customized solutions to our clients in all the industries require a sterile surrounding atmosphere. We are a group of dedicated and determinant beings trying to serve all our customers with the high quality and satisfactory solutions with the budget which is in best of client interest.

"Our motto is to supply quality products at best possible price on promising time for utmost customer satisfaction."

Why Choose NEM

At Neelansh Equipments & Machines we believe that the future of our business depends on the quality of our products. We try to provide better services to our customers & to achieve their optimum satisfaction.

We have trained personal to inspect the products as per guidelines of the quality assurance system. We better realize customer satisfaction for this purpose we execute better quality management system that meets customer's requirements.

Static pass box

Static pass box, fabricated with 304 / 316 grade combinations stainless steel and high quality components and are capable of eradicating pollutants completely from the air with UV light along with hour meter, Fluorescent light, buzzer indicator to know the material is kept inside and indicating lamp, these static pass boxes provide excellent working performance in the clean room facility.

Application

- Pharmaceutical industry
- Chemical Research laboratory
- Electronic industry
- Semi-Conductor Production
- Food Processing Industry

Technical Specification:

Construction	S.S 304/316/316L or combination
Door	Solid door with mechanical or electrical interlocking
Window	Tempered Glass
Electrical's	Hour Meter, Fluorescent light, UV lights, Electromagnet for door interlocking
UV Lamp	Yes

Dynamic pass box

Dynamic Pass Box equipment are made of high grades stainless steel (304/316/316 L) with international quality standard components including mechanically or electrically interlocked doors and UV light.

Application

- Pharmaceutical industry
- Chemical Research Laboratory
- Electronic industry
- Semi-Conductor Production
- Food Processing Industry

Technical Specification:

Construction	S.S 304/316/316L or combination
Door	Solid door with mechanical or electrical interlocking
Window	Tempered Glass
Electrical's	Hour Meter, Fluorescent light, UV lights, Electromagnet for door interlocking
UV Lamp	Yes
HEPA Filter	Yes
Pre filter	95% Efficiency (EU-4 Rating)
Hepa Filter	Efficiency upto 0.3 Micron
Electrical's	Hour Meter, Fluorescent light, UV light, Electromagnet for door interlocking. Buzzer and indicator lamps, ON/OFF switch for blower
Accessories	Hour meter, Magnehelic / Minihelic Pressure Gauge

Bio-Safety Cabinet

Neelansh Equipments & Machines is a leading manufacturer, supplier & exporter of bio-safety cabinet. Bio-safety cabinet is mainly used for better micro-biological practices, safe containment zone from infection, micro organism and better product protection. It provides an enclosed and ventilated workspace where enclosed space provides better safety.

Application

- Pharmaceutical industry
- Chemical Research Laboratory
- Electronic industry
- Semi-Conductor Production
- Food Processing Industry

Technical Specification:

Pre Filter	EU-5 rating (Efficiency 95 % Down to 5 μ m).
Air Balancing	70% Re-circulation & 30% Exhaust Laminar Air.
Exhaust Filter	Rated At working Place $90\pm 20\%$ FPM (0.45 ± 0.05 mps)
Air Cleanness	Class 100, ISO Class 5.
Average Air Flow Velocity	Rated At working Place $90\pm 20\%$ FPM (0.45 ± 0.05 mps)
Noise Level	Less than 68 ± 3 dBs on a scale
Air Blower	0.5HP 1400 RPM single phase running at 230 V, 50/60 Hz motor blower.

Garment Cubicle (HEPA Cabinet) :

Garment Cubicles with HEPA Filters are used for storing sterile aprons, garment & other accessories. The unit prevents contaminations from outside dust particles and air borne bacteria. The inside of the cubicle is flushed with fresh air supplied from HEPA filter which is re-circulated

**We manufacture
top class STATIC
&
DYNAMIC GARMENT
CABINET of standard
& customized
sizes.**

Technical Specification:

Construction	MS powder Coated/ SS 304/ SS 316
Filtration	1 st stage: Fine Filter with efficiency of 95% down to 5 micron. 2 nd Stage: HEPA Filter with efficiency of 99.999% down to 0.3 micron.
Doors	Single or Double door (Sandwiched, type.)
Electrical Accessories	LED Lights, 5/15 Amp socket,
Velocity	0.45 +/- 0.005 m/s
Noise	Less than 67 dB

Dispensing Booth/ Reverse Laminar Air Flow

Neelansh equipment & machines is a salient manufacturer, supplier & exporter of stainless steel dispensing booth / reverse Laminar Air Flow. Laminar Air Flow is compatible in every working environments where it can be used in Pharmaceutical and Biotech.

Application

- Pharmaceutical Industry
- Chemical Research laboratory
- Electronic industry
- Semi-Conductor Production
- Food Processing Industry

Technical Specification:

Filter

- HEPA Filter (0.3 Microns)
- Pre Filter (10 Micron)
- Fine Filter (5 Micron)

Air Flow
Direction

Recirculating laminar air flow.

Air Velocity

90 ± 20 cfm (Average).

Noise Level

68 ± 3 dbs.

Air Shower

Air shower are made of high grade stainless steel (304/316/316L) with standard components for efficient operation.

Application of Air Shower:

- Pharmaceutical Industry.
- Biological Manufacturing Industry
- Air and Space Industry.
- Food processing Industry.

Technical Specification:

MOC	S.S. 304/316/316L
DOOR	2 doors with glass.
Electrical	Tube light, Balanced Motor Blower, Electromagnet for doors, Door Bells, Light Indicator.
Optional	PLC & HMI control panel Hour Meter
Filters	HEPA: grade H14 Pre filter grade EU 5.
Nozzles	S.S. nozzles.
Number of nozzles	6, 12 & more.
Nozzle position	Left, Right and Top.
Jet velocity	18-28 m/s.

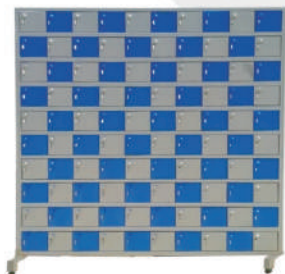

LOCKERS

Powder Coated Personal Locker
20 Compartment
